

EQST 224 : Schooling Techniques

This course is designed to provide students with a background which will enable them to evaluate a horse, rider and design a program to provide optimum results. The course will address three main areas: (1) understanding the mechanism of the horse and its functions, (2) defining and understanding the rider's position and its use, and (3) applying these concepts in actual labs.

Semester Hours 3.0

Prerequisites

EQST 360 recommended.
