

EGSC 110: Introduction to Engineering Science I

Introduction to engineering fundamentals and preparation for success through integration of problem solving and engineering design, ethical decision-making, teamwork, and communicating to diverse audiences. Students will be introduced to the different types of engineering, including aerospace, biomedical, chemical, civil, computer, electrical, environmental, and mechanical engineering. Pre or corequisite: MATH 121 Four credit hours.

Semester Hours: 4

Program: Engineering
