

MATH 123: Pre-Calculus

Precalculus is designed to help students develop the computational and problem solving skills needed to succeed in calculus. Topics covered will include: Solving and graphing equations of exponential, logarithmic, and trigonometric functions, trigonometry including analytical trigonometry, and an introduction to limits. This class is not intended as a terminal mathematics course. Prerequisites can be satisfied by a C or better in 121 or placement as determined by a departmental placement exam. This course is taught in Fall and Spring semesters.

Credits: 3

Prerequisites:

Program: Mathematics
